

Technical Skills Course – Excel for Actuaries Beginner’s Course

Actuarial Excel Test Part 4 Description

Download the excel workbook titled “TSC Actuarial Excel Test Part 4 Template”

Task 1: Create a pivot table of claim amounts by incurred_yyyymm and reported_yyyymm

Go to the “Claim Triangle” tab to create your pivot table.
incurred_yyyymm should be the rows and reported_yyyymm should be the columns. Put the sum of the claim amounts in the aggregation area.

Task 2: Create a pivot table of claim counts by incurred_yyyymm and reported_yyyymm

Go to the “Claim Triangle” tab to create your pivot table.
incurred_yyyymm should be the rows and reported_yyyymm should be the columns. Put the count of the claim amounts in the aggregation area.
